Non-Members: \$250+GST

Are you getting all you can from Excel?

Do you want to learn how to efficiently summarize your data and create data visualisations that engage?

Do you want to up your data viz skills?

Join us for our first ever online mini-course!

**Monday May 25th to
Friday May 29th 2020
10:00 am – 12:00 pm everyday**

In this hands-on online course, you will:

- Create pivot tables in Excel and adapt them to answer emergent questions.
- Create charts and visuals that auto-update from refreshed pivot tables.
- Use conditional formatting and pivot tables to create heat maps.
- Theme basic qualitative data in Excel and summarize it with pivot tables.

For each topic, Carolyn will use a three-stage teaching method:

1. See one - Watch Carolyn go through each step
2. Mirror one – Go through each step with Carolyn
3. Do one – Go through each step on our own (with Carolyn ready to trouble shoot)

This workshop is intended for individuals familiar with Excel. Have your laptop ready to use and ensure your version of Excel has the option for pivot tables.
